Financial Services Committee

Ranking Member, Oversight & Investigations Subcommittee

Veterans' Affairs Committee

KFB NATIONAL PRIORITIES

KFB-DC

02.23-27.19

NATIONAL FARM POLICY

- **Federal crop insurance programs should be maintained at current levels to provide an effective safety net for agriculture.**
- **Support crop insurance initiatives to maintain the integrity of crop insurance.**
- **Support NRCS assistance for the development of additional water resources for irrigation and livestock use.**
- **Support modifying USDA Rural Development broadband programs to increase access to broadband service that meets or exceeds FCC standards.**

The farm bill provides authorization for services and programs that impact every American and millions of people across the world. Farm bill programs are designed to provide farmers with the safety net to survive major natural disasters or adverse market factors. Timely and effective implementation of these programs is critical.

TRADE

- **Support fair and open multilateral trade agreements that will open new markets and expand existing markets for U.S. agricultural products.**

International trade accounts for roughly one third of total U.S. farm income, and with the productivity and efficiency of the American farmer, exports must continue to grow. However, it is critical that sound, multilateral international trade agreements are drafted that will help farmers compete globally on a level playing field with access to the world's consumers.

INFRASTRUCTURE

- **Support maintenance and improvement of transportation infrastructure, including rural highways, lock and dam systems, riverports, and railroads.**

Development and maintenance of transportation infrastructure is essential in getting commodities to markets both domestically and abroad. Current U.S. infrastructure is a key advantage over many of our foreign competitors, and that advantage must be maintained. Equally important to agriculture is having reliable, high speed broadband available for rural Americans to utilize.

REGULATORY REFORM

- **Support a thorough regulatory review to ensure regulations do not impose an undue economic burden on any segment of society and the regulatory process is transparent and results achievable.**
- **All regulations should be based on sound, peer-reviewed scientific data that can be replicated.**
- **Support congressional oversight of federal agency regulatory actions to ensure rules and regulations do not exceed the intent and authority of federal law.**

Federal regulatory reform to remove burdensome regulations is recognized as a primary factor that slows economic growth and innovation. Issues such as the Waters of the United States rule, endangered and threatened species protection, pollinator protection, climate change and farm labor rules are examples of far-reaching federal regulatory oversight impacting agriculture.

IMMIGRATION & FARM LABOR REFORM

- **Support immigration reform that includes restructuring the H-2A program to streamline the process making it more reliable, economical and simple for farmers to participate.**

Farmers face a shortage of workers willing and able to work on farms. Nationally, an estimated \$5-9 billion in annual production is at risk if adequate farm labor cannot be secured. The current H-2A program needs reforms to be simpler, more cost effective and easier for farmers to use.

HEALTH CARE REFORM

- **Support changes to current health care law that will stabilize the market, encourage competition that will reduce health care costs and increase consumer choice.**

Health insurance is their largest monthly payment for many farm families. Lack of competition among providers in recent years has driven many premiums up. An effort to address delivery of quality health care at a reasonable cost on the national level continues.

FISCAL POLICY

- **In order to protect the future integrity of our nation's economy it is in our best interest to address budget deficits, which erode our ability to remain fiscally stable with the goal of reaching a balanced budget.**
- **Federal tax code should be reformed based on sound economic principles to create a more competitive business climate.**

Federal debt affects economic growth. Government spending currently accounts for around a fifth of economic activity in the U.S. This means more Federal dollars are needed to service the debt with fewer dollars to build roads, continue needed federal programs or provide tax incentives to spur business growth.

WILDLIFE ISSUES

- **Support a producer's right to protect livestock and property against nuisance wildlife predation.**
- **Support a nationwide depredation order, or safe harbor provision, to take black vultures.**

Producers face crop and livestock losses from a multitude of wildlife including coyotes, feral hogs, black vultures, deer, elk and black bears. Protection of livestock and property against depredation is critical to a farmer's profitability.
